

www.readingsight.org.uk

We know children love books and love to read, but when they face difficulties accessing reading due to vision or print impairments, it is sometimes hard to know where to go for help. The good news is that we can help you find the best formats for you and your young reader.

- Large print books
- Giant print books
- Braille
- Audiobooks
- eBooks and eAudio
- Tactile books

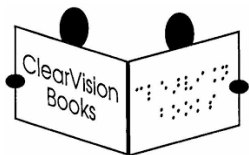

Alternative formats are available direct through your local library, or we can signpost you to specialist organisations who can provide more support, content and information.
